The Cub Cadet XZ1 137 zero-turn ride on lawn mower is a popular design for larger lawns. It is powered by a beefy Kawasaki V-Twin overhead valve engine. The twin-cylinder engine is more efficient and smoother than single-cylinder engines. The engine has a full-pressure lubrication system for longer life. This "special order" machine features two adjustable levers which provide maximum control from the quickly adjustable seat. Zero-turn means that on full lock this lawn mower leaves no uncut grass. The dual hydrostatic transmission is fully automatic, ensuring one foot pedal does everything. The 137cm/54" mowing deck contains three belt-driven cutting blades to mow 25 per cent more lawn per cut than a 40" lawn mower. Combined with a forward speed of 7mph (3mph in reverse), this ride-on mower can reduce mowing time dramatically over many other types of mowers. The Cub Cadet XZ1 137 features four adjustable-gauge wheels at the deck corners to minimise scalping the lawn. Cut grass is discharged through the side and there is an optional twin grass bag available to collect grass via a side chute.
